Education

McMaster University

Sep 2021 – Present

Bachelor of Applied Science in Computer Science

Hamilton, Ontario

- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Databases, Machine Learning, Natural Language Processing

Experience

Cooperators

Sep 2024 – Aug 2025

Associate Technical Support Specialist

Burlington, Ontario

- Resolved **100+ Windows/macOS tickets monthly** while maintaining a **95% SLA**, consistently ranking among top ticket resolvers and supporting senior leadership and executive stakeholders.
- Collaborated with cross-functional teams and vendors, improving resolution time by **20%**.
- Developed custom **PowerShell** automation integrating with the **ServiceNow API** to auto-triage tickets and reduce manual processing time by **40%**.
- Authored **25+ internal knowledge articles**, reducing repeated inquiries and tickets by **25%**.

MoMacMo

Jun 2023 – Dec 2023

Software Developer Intern

Remote

- Deployed and managed large-scale geophysical datasets on **Microscopium** using **AWS**, enhancing visualization and analysis of complex data.
- Provisioned and configured an **AWS EC2 instance**, deploying Microscopium with remote access via **TigerVNC** and public tunneling through **ngrok**, supporting visualization of large geophysical datasets.
- Documented deployment and setup procedures, enabling easier onboarding and knowledge transfer for future contributors.

Projects

NexDerm – AI Skin Disease Classifier

Sep 2025 – Present

FastAPI, Python, PostgreSQL, React Native, Docker

- Engineered an **ensemble CNN pipeline** (DenseNet + ResNet) trained on **10+ GB** using McMaster HPC, enabling scalable multi-class skin disease classification.
- Implemented advanced data augmentation and hyperparameter tuning, achieving **80%** validation accuracy on **36.7k** dermatology images.
- Built a **scalable full-stack platform** with **Node.js REST APIs** and **PostgreSQL** supporting secure image uploads and real-time ML inference.

Local RAG Chatbot

Oct 2025 – Jan 2026

LangChain, Ollama, Python, REST APIs

- Built a **local retrieval-augmented generation (RAG)** chatbot over restaurant reviews, generating embeddings with **Ollama** and indexing vectors in a **Chroma** database for semantic search.
- Implemented an end-to-end retrieval pipeline using **LangChain**, performing **top-5** similarity search to inject relevant context into prompt templates and improve answer grounding.
- Deployed a fully local inference stack using **llama3.2** via Ollama, achieving **sub-2s** response latency while maintaining private, offline question answering.

CityLab – City of Hamilton SharePoint Optimization

Sep 2025 – Dec 2025

SharePoint Online, UX Research, Figma

- Partnered with the City of Hamilton to redesign **SharePoint Online** for **30+ municipal staff**, improving navigation efficiency by **30%**.
- Conducted **15+ user interviews**, surveys, and workflow analyses to identify collaboration bottlenecks.
- Delivered modern **UX-driven layouts** and documentation, enabling smooth organizational adoption.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML, CSS, PowerShell, Bash

Developer Tools: Git, GitHub, VS Code, JupyterHub, AWS, Docker, Postman, Jira, PowerBI

Frameworks: PyTorch, TensorFlow, scikit-learn, NumPy, Pandas, React, Node.js, Tailwind CSS, LangChain, REST APIs, PostgreSQL
