Education

McMaster University

Sep 2021 – Apr 2026

Bachelor of Applied Science (B.A.Sc.), Computer Science

Hamilton, Ontario

- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Databases, Machine Learning, Natural Language Processing

Experience

Cooperators

Sep 2024 – Aug 2025, Jun 2026 – Present

Associate Technical Support Analyst

Burlington, Ontario

- Resolved **80+** support tickets (Windows/macOS) monthly using **ServiceNow**, maintaining **95% SLA** compliance and consistently ranking among top performers while supporting executive stakeholders.
- Performed **incident and problem management, troubleshooting, and root cause analysis** in collaboration with cross-functional teams and vendors, improving resolution time by **20%**.
- Developed **PowerShell** automation scripts integrating with **ServiceNow APIs** to streamline ticket processing, reducing manual processing time by **40%**.
- Authored **25+** knowledge base articles to support self-service troubleshooting, reducing recurring incidents by **25%**.

MoMacMo

Jun 2023 – Dec 2023

Software Developer Intern

Remote, Canada

- Deployed and optimized large-scale geophysical datasets on **Python-based Microscopium** platform using **AWS**, enhancing system scalability and improving visualization performance by **30%**.
- Provisioned and configured **AWS EC2** cloud infrastructure, enabling remote environment access via **TigerVNC** and secure tunneling with **ngrok**, reducing setup time by **50%**.
- Documented deployment workflows and system configurations to ensure reproducibility and accelerate onboarding by **40%**.

Projects

NexDerm – AI Skin Disease Classifier

Sep 2025 – Apr 2026

FastAPI, Python, PostgreSQL, React Native, Docker, AWS

- Designed and trained **deep learning models** (CLIP, DenseNet, ResNet) for **computer vision**-based multi-class skin disease classification using **PyTorch** on McMaster HPC infrastructure (**10+ GB** dataset).
- Built an end-to-end **machine learning pipeline** including data preprocessing, augmentation, **hyperparameter tuning**, model training, and evaluation, achieving **80%** validation accuracy on **36.7k** dermatology images.
- Developed a **scalable full-stack application** with **RESTful APIs** using **Node.js** and **PostgreSQL**, enabling secure image uploads and **real-time ML inference** in a production-ready environment.

Local RAG Chatbot

Oct 2025 – Jan 2026

LangChain, Ollama, Python, REST APIs

- Built a **local retrieval-augmented generation (RAG)** chatbot using LLMs (llama3.2) over restaurant reviews, implementing semantic search using **vector embeddings** stored in **ChromaDB**.
- Implemented an end-to-end retrieval pipeline using **LangChain**, performing **top-5** similarity search and applying **prompt engineering** techniques to inject relevant context into structured prompt templates, improving answer grounding and response accuracy.
- Deployed a fully local LLM inference system using **llama3.2** via **Ollama**, achieving **sub-2s** response latency while maintaining private, offline question answering.

CityLab – City of Hamilton SharePoint Optimization

Sep 2025 – Dec 2025

SharePoint Online, UX Research, Figma

- Partnered with the City of Hamilton to redesign **SharePoint Online** for **30+ municipal staff**, improving navigation efficiency by **30%**.
- Conducted **15+ user interviews**, surveys, and workflow analyses to identify collaboration bottlenecks.
- Delivered modern **UX-driven layouts**, enabling smooth organizational adoption.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML, CSS, PowerShell, Bash

Developer Tools: Git, GitHub, VS Code, JupyterHub, AWS, Docker, Postman, Jira, PowerBI, ServiceNow, Linux

Frameworks: PyTorch, TensorFlow, scikit-learn, NumPy, Pandas, React, Node.js, Tailwind CSS, LangChain, RESTful APIs, PostgreSQL
